Comments:

Jenny is my 4th T.A. and by far the best. Teaching and organization are activities that she excels in. She was very popular with the undergraduates. They picked up on her passion for oceanography and her grading fairness. This evaluation has been reviewed by the graduate assistant and faculty mentor or supervisor.

Jenny put a lot of effort and time into being a T.A., over and above what most PhD students are willing to do. I believe she would be an excellent teaching faculty upon completion of her PhD.

Please see attached student comments.

I thought that Jenny did an excellent job. You could tell that she was very passionate about what she taught. She also was very dedicated to really reading & grading our papers. The extra information given about writing papers showed how much time she was willing to put forth to this class. This also helped in writing papers not only in this class but for all other classes taken currently & in the future.

Jenny was very helpful with
this class. She put forth
a lot of effort to make
sure every student could
succeed in the class. She
is also very passionate
about Oceanography
which is obvious and ~~gets~~
helps to get students
interested.

She was extremely helpful when I had questions on assignments. Her lectures were interesting & they went well with Dr. Walker's lectures.

TA

I thought she was a great TA, always prepared and a hard worker, I have never had another class that TA printed out our outlines and all.

Teacher Eval for Jennifer Lentz

- She was so helpful making the writing guidelines! It was really appreciated.
- The two classes that she taught were done really well and her handouts were really good.
- Really nice woman! It's easy to see that she is into Oceanography and really likes the subject.

Jenny was an excellent TA always available for help and enthusiastic about the class. Gave two lectures during the semester and did a great job at presenting the material.

I thoroughly enjoyed this class. Dr. Walker and our T.A. Jenny did a great job with the course. It was interesting and very informative.

Jenny is the best TA I have ever had in a class. She was so organized, and always helped me when I needed it. She was also very timely about her emails. A++++

Jenny was super cool, and had very informative lectures. She seemed to know what she was talking about.

I liked jenny teaching. She was
very interested in what she was
talking about. She was a fair
grader.

The TA was very helpful and gave
good feedback when needed

venny-

VERY GOOD TA. she grades VERY
FAIR. I really liked her presentation
about corals, very interesting!

Jenny was effective as a T.A.; allowed us to receive quiz points & detailed grading of assignments. Very good substitute when Dr. Walker was absent. Very passionate about Corals.

I think Jenny was a great TA. Her lecture was informative and interesting. I liked that she brought visuals for her lecture as well. She was also available to email at any time.

Fantastic. Coral lecture was best of year.

The T.A. was very organized and interesting. She went out of her way to provide helpful information to the students.

She was a very informative teacher
She was kind and helpful & tried
to help us understand what she
wanted.

I think Jenny is an excellent TA. She's really good at what she does because she really cares about the ocean. She gets our assignments graded in a timely manner. She is very efficient. However, I feel that our homework should be graded more on the material rather than the grammar & numerical citations. Jenny is very passionate about her job and I've enjoyed her being my TA.

She was helpful and very efficient
with answering questions through
e-mail.

Jenny was an awesome

TA... She was so organized,
intelligent, and willing to
help.
